

Physics 137b: Midterm #1 Information

The first midterm is scheduled for Fri Feb 26 in class. You will be allowed to open the exam at exactly 9:10 and will be asked to close the exam at 10:00. The exam is closed book, but you may use one sheet of paper ($8\frac{1}{2} \times 11$ inches) with whatever information you wish written on it. You will not need a calculator. If you need any integrals other than polynomials or simple trig functions, you will be given a table of integrals. If you need hydrogen wave functions, Clebsch-Gordon tables or spherical harmonics, you will be given them.

Please bring a blue book or paper for you exam.

The exam will cover the material on the first four problem sets and the material covered in class up to and including Feb 12.

Medical excuses will only be accepted with a note from your doctor. There will be no makeup exams. If any students have a valid medical excuse, the second midterm will count double.

The Mon and Wed sections this week will serve as review sessions and Tom will have his normal office hours on Tuesday 1-2 PM and Thursday 4-5 PM in 421 Birge. Professor Shapiro is out of town this week, so she will NOT be having office hours. Please send any questions to her by email (md-shapiro@lbl.gov).
